Understanding Busy Professionals Through UX Research

DecodeLabs — Project 1
UI/UX Industrial Training

PRESENTATION-1

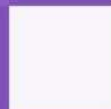

Understanding the User Before Design

Problem Statement

Busy office professionals often struggle to maintain healthy fitness routines due to long working hours, stress, and lack of time. This project focuses on understanding user behavior, emotions, and pain points before designing a fitness solution.

The goal of this research is to identify user needs and create a user-centered fitness experience through personas and empathy mapping.

Empathy Map

Understanding User Thoughts and Behaviors

Thinks

Feels

THINKS

- I should exercise more.
- I need a healthier lifestyle.

FEELS

- Stressed
- Tired
- Unmotivated

DOES

- Works long hours
- Skips workouts
- Uses fitness apps occasionally

SEES

- Fitness content online
- Busy work schedules
- Health advertisements
